

| LIGHT RAIL CRANES

MAIN FEATURES

- Modular design perfectly suitable for machine shops, inspection tables and small assembly areas
- Can easily adopt at low height areas and can be suspended directly from concrete ceiling
- Effortless and smooth handling at work stations
- Excellent hook headroom and hook reach at ends compared to conventional crane
- Higher work efficiency and excellent pace in material handling
- Almost maintenance free system
- Designed to use with electric chain hoists but in special cases, electric wire rope hoist can also be used
- Main industry applications: CNC machine shops, inspection areas in foundry, clean rooms, automotive parts assembly etc.
